

2-JAW PARALLEL GRIPPERS

INDIVIDUALIZATION PRESSURE SAFETY VALVE

► SPECIFICATIONS COMPARED TO STANDARD PRODUCT

- Adapted to the gripper's contour
- Can be mounted directly without tubing

► CUSTOMIZABLE SERIES

Series GPP5000AL
2-Jaw Parallel Grippers

Series GPP5000
2-Jaw Parallel Grippers

► APPLICATION DESCRIPTION

- The pressure relief valve is used to trap the compressed air in the gripper in the event of a drop in compressed air.
- This maintains the gripping force and prevents unintentional movement with spring-assisted grippers.

► APPLICATION EXAMPLE
